FROM: Trevor Douville, Senior EMS Specialist

SUBJECT: Stroke System

The Riverside County Stroke System went live on April 1, 2014. A total of 10 hospitals have been designated as Stroke Centers. Three levels of Stroke Center are designated: Stroke Ready Hospital, Primary Stroke Center, and Interventional Stroke Center. Stroke Ready Hospitals will be recognized only until April 1, 2015, at which time all Stroke Centers must have achieved at least the level of Primary Stroke Center. No issues have been identified in the system at this time.

The Stroke Committee has identified four indicators that we feel are important to monitor on suspected stroke patients: Glucose testing; scene time > 20 minutes; transport to a designated Stroke Center; and completion of a Cincinnati Stroke Scale.

ACTION: PMAC should be prepared to receive the information and provide feedback to REMSA

RIVERSIDE COUNTY AMBULANCE PATIENT OFFLOAD DELAYS

HISTORICAL COMPARISON

Data provided illustrates total ambulance patient offload delay time (hh:mm) by month for 2010-2014 by hospitals within Riverside County. To qualify for this chart, the duration of offload delay must be greater than 30 minutes (2013 and forward) and only the time period after the first 30 minutes is summed. 2010-2012 Offload delay data used a 25-minute standard.

AMBULANCE PATIENT OFFLOAD DELAYS AND OVERALL COMPLIANCE

This data includes 2013 and 2014 Ambulance Patient Offload Delays, hours of delay, total time the ambulances and patients are delayed, ALS transports received by each hospital, compliance, and average delays per occurrence. "Delay Hours" include any time after the initial 30 minutes in the ED have passed; "Total Delay Time" sums both the delay and the initial 30 minutes. "Compliance" represents the percentage of ALS ambulance transports that were not held on Offload Delay.

SUBJECT: EMS System Evaluation & Strategic Planning

Strategic planning meetings have been held on March 26, April 23, and May 14. The next strategic planning meeting will be on June 25 at the Ben Clark Training Center Auditorium from 9:30 to 11:30 AM. On June 5, a survey was sent to EMS system stakeholders to receive feedback on prioritizing the recommendations and the results of the SWOT analysis. A writing advisory group was formed to review the draft EMS System Strategic Plan and the results of the SWOT analysis before it is shared with the broad stakeholder groups for their feedback.

Reports and minutes can be accessed on our website at: www.rivcoems.org.

ACTION: PMAC should be prepared to receive the information and provide feedback to REMSA.

SUBJECT: CQI TAG

The CQI TAG met on April 17. REMSA's CQI plan is posted on www.remsa.us and includes all of the State Core Measures, as well as seven additional indicators mandated by REMSA. These indicators are in the process of being validated and tested for reliability, with an implementation date of October 1. All providers and base hospitals will be required to collect data on all of the indicators in order to be in compliance with the Riverside County EMS Agency QI Program.

Letters were sent to all base hospitals and providers in January requiring that CQI plans be updated to require ALS Skills Lab completion for all paramedics and MICNs. Additionally, all ALS ambulances and fire vehicles that carry narcotics are required to submit their Controlled Substances Policy to REMSA to be kept as an appendix to the CQI plan. These policies must be in compliance with REMSA Policy #3302 (Controlled Substances)

On June 3, 2014, REMSA hosted a Root Cause Analysis Workshop, taught by Craig Stroup of Contra Costa County EMS Agency. This workshop was filmed by Cal Fire and will be available for anyone unable to attend the workshop once editing is completed. This workshop sets the baseline for how the REMSA CQI TAG will perform Root Cause Analysis.
