RIVERSIDE COUNTY EMS AGENCY

Week 16 (04/14/24 – 04/20/24)

Riverside County EMS System Status **Week 16 Summary**		
9-1-1 Responses	↑	**5,108** 9-1-1 responses — **3.3% INCREASE** from the previous week - Pg 3
9-1-1 Transports within Riverside County	↑	**3,519** 9-1-1 transports — 4.8**% INCREASE** from the previous week - Pg 3
Ambulance Patient Offload Delay (APOD)	↑	**710** Ambulance Patient Offload Delays — **23.7% INCREASE** from the previous week - Pg 3
APOD Hours	↑	**305.5** Ambulance Patient Offload delay hours –**24.0% INCREASE** from the previous week - Pg 4
APOD Compliance	↓	**79.8%** APOD Compliance — **3.7% DECREASE** from the previous week - Pg 2
Ambulance Patient Offload Time (APOT) >90 min	↑	**76** transports with APOT >90 min — **4.1% INCREASE** from the previous week - Pg 5
Emergency Treatment Services	↓	**81** ETS transports —**4% DECREASE** from the previous week – **65% OFFLOAD < 30 min** - Pg 6
EMS influenza-like-illness (ILI)	↔	**74 ILI** responses, **SAME AS** the previous week, **BELOW 2 STD** from Baseline– Page 8

This report and all published APOT reports can be found at:

RIVERSIDE COUNTY EMS SYSTEM - SPECIAL SEASONAL REPORT

In an effort to monitor Ambulance Patient Offload Time (APOT) and influencing factors such as seasonal surge, Riverside County EMS Agency is publishing weekly reports. The following graphs and charts represent weekly aggregates of 9-1-1 Responses, Transports, and Ambulance Patient Offload Delays (APOD) across Riverside County. *(For more details on methods and definitions, reference the end of this report)*

## TRANSPORT & AMBULANCE PATIENT OFFLOAD TIME BY HOSPITAL

2024 WEEK 16					
	911 Transports	APOT	APOD Hours	APODs	APOD Compliance
Corona Regional Med Ctr	193	140:05:51	67:09:31	81	**58.0%**
Desert Regional Med Ctr	320	69:55:29	2:14:58	10	96.9%
Eisenhower Health	339	70:56:05	5:41:11	15	95.6%
Hemet Valley Hospital	302	157:04:03	42:44:31	100	**66.9%**
Inland Valley Med Ctr	240	119:13:11	43:06:53	73	**69.6%**
JFK Hospital	195	30:02:55	1:35:38	6	96.9%
Kaiser Hospital Moreno Valley	98	51:07:46	15:06:10	38	**61.2%**
Kaiser Hospital Riverside	136	58:15:40	12:19:34	35	74.3%
Loma Linda Univ Med Ctr Mur	190	99:16:58	22:57:30	70	**63.2%**
Menifee Med Ctr	83	27:41:10	1:38:09	9	89.2%
Palo Verde Hospital	32	3:20:51	0:00:00	0	100.0%
Parkview Community Hospital	152	53:41:07	6:08:13	23	84.9%
Rancho Springs Med Ctr	117	36:52:40	3:43:38	13	88.9%
Riverside Community Hospital	454	189:55:06	37:16:56	108	76.2%
Riverside University Health System	388	111:50:11	2:12:51	22	94.3%
San Gorgonio Mem Hospital	141	76:17:33	19:57:49	55	**61.0%**
Temecula Valley Hospital	139	75:17:47	21:35:33	52	**62.6%**
Totals	**3,519**	**1370:54:23**	**305:29:05**	**710**	**79.8%**

Transports and APOD Compliance by Hospital
RESPONSES, TRANSPORTS, AND APOD OVER TIME

## Weekly Transports and APODs
2024 Week 01 through Week 16
Weekly Transports and APODs
2024 Week 01 through Week 16

*Transports include only 9-1-1 transports to Riverside County hospitals*

- During Week 16, there were a total of **5,108 ALS responses** in Riverside County—3.3% INCREASE from the previous week's total of 4,946 responses.
- During Week 16, there were a total of **3,519 transports** in Riverside County— 4.8% INCREASE **from** the previous week's 3,358 transports.
- During Week 16, there were a total of **710 APODs** in Riverside County— 23.7% INCREASE from the previous week's total of 574 APODs.

The following chart represents weekly aggregate APOT and APOD hours (hh:mm:ss) for the past 16 weeks. APOT begins at patient arrival at hospital (eTimes.11) and ends when patient care is transferred to the hospital (eTimes.12). APOD calculation begins when APOT exceeds the 30-minute transfer of care standard defined in REMSA Policy 4109.

Weekly APOT and APOD Hours
2024 Week 01 through Week 16
- During Week 16, **APOT county-wide totaled 1370.9 hours** — 12.0% INCREASE from the previous week's total of 1224.3 hours.
- County-wide **APOD hours for Week 16 totaled 305.5 hours**, a 24.0% INCREASE from the previous week's total of 246.3 hours.

The data provided below illustrates the total APOD time (hh:mm) by month over the last five years. This chart is a summation of offload time delays only and excludes the initial 30-minute period defined as the standard transfer of care time.

Riverside County Monthly Ambulance Patient Offload Delay Hours (2018 - 2024) Participating Providers

Aprɫ is a partial month

AMBULANCE REDIRECTION

REMSA Policy 6104 allows redirection of ambulances away from hospitals experiencing significant Ambulance Patient Offload Delays (APOD) to the next most appropriate facility. *Significant* APOD is defined as a patient remaining on an ambulance gurney for **90 minutes or greater after arrival at the hospital** (APOT > 90 min). Standard transfer of care is 30 minutes or less (APOT<30 min). Until the transfer of care is complete (patient is removed from the gurney and hospital staff assume care of the patient), ambulance crews must remain at the hospital and continue care. While patients held on excessive APODs are generally those classified as lower acuity, approximately one-third of the County's ~600 daily 9-1-1 medical responses are determined by dispatch as critical, requiring immediate medical attention (e.g., cardiac arrest, stroke, traumatic injury). As a result, excessive, or multiple APODs within the same service area impact ambulance timeliness and availability in the field posing direct risk to 9-1-1 patient safety. Ambulance redirection is one strategy to reduce the consequential backlog of EMS services which occurs when there are excessive ambulance delays at hospital emergency departments. Below is the Week 16 countywide breakdown of APOD occurrences where ambulances were documented as held for greater than 90 minutes before transfer of care.

Patient Offload Delays Greater than 90 Minutes
- During Week 16, **76 ambulances were delayed greater than 90 minutes** — 4.1% INCREASE from the previous week's total of 73.

Facility	Total Time APOT>90 min (HR: MM: S)	Total Incidents APOT>90 min
Corona Regional Med Ctr	24:46:13	24
Desert Regional Med Ctr	0:00:00	0
Eisenhower Health	0:45:12	2
Hemet Valley Hospital	8:40:51	13
Inland Valley Med Ctr	9:10:17	13
JFK Hospital	0:00:00	0
Kaiser Hospital Moreno Valley	0:19:55	1
Kaiser Hospital Riverside	1:27:00	3
Loma Linda Univ Med Ctr Mur	1:52:04	7
Menifee Med Ctr	0:00:00	0
Palo Verde Hospital	0:00:00	0
Parkview Community Hospital	0:12:10	1
Rancho Springs Med Ctr	0:00:00	0
Riverside Community Hospital	5:24:42	6
Riverside University Health System	0:00:00	0
San Gorgonio Mem Hospital	0:18:27	4
Temecula Valley Hospital	1:25:25	2
Grand Total	**54:22:16**	**76**

EMERGENCY TREATMENT SERVICES

Transports to Emergency Treatment Services (ETS) comprise over 3% of overall transports. This is significant enough to impact the EMS system and, therefore, warrants reporting. However, transports to ETS do not meet the EMSA definitions for APOT (see page 10); therefore, they are not included with the previous APOT aggregates.

ETS Snapshot- 2024 Week 16					
	Transports to ETS	**Total Offload Time**	**APOD Hours**	**Offload >30min**	**Compliance**
Emergency Treatment Services	81	36:58:20	4:25:43	28	65.4%

The chart below represents Riverside County's total number of *ETS ambulance transports, patient offload delay (APOD), and percent compliance* for the current week and a rolling 15 weeks prior.

- During Week 16, there was a total of **81 transports to ETS** – a 4% DECREASE from the previous week.
- During Week 16, **35% resulted in offload > 30 minutes – SAME AS** the previous week.

ILI - INFLUENZA-LIKE ILLNESS RESPONSE

While influenza is detected year-round, it is most common during fall and winter. Increases in influenza-like-illness (ILI) generally begin in October and peak sometime between December and February (https://www.cdc.gov/flu/about/season/flu-season.htm).

Hospital Emergency Departments (EDs) generally experience an increase in volume during flu season which, in turn, can impact Ambulance Patient Offload Time. The purpose of the Riverside County EMS system ILI (Influenza-like Illness) reporting is to improve tracking of influenza-related activity and facilitate EMS preparedness in the event of a significant surge event, similar or greater than that observed during the 2017-18 flu season.

Week 40 (~October 1st) is defined by the Center for Disease Control (CDC) as the expected start of increasing influenza activity, or "flu season". Riverside County EMS Agency monitors influenza-like illness (ILI) year-round for better detection of seasonal or abnormal surges which can impact EMS utilization.

The ILI trigger evaluates electronic patient report (ePCR) data using the following methodology:

1. Filters primary or secondary impression of code J11 (Influenza due to unidentified influenza virus) OR
2. A primary / secondary impression code J80, J98.09 (Acute respiratory distress syndrome, Respiratory disorder unspecified) with a match in the narrative for ILI, influenza like illness, Flu, Flu-, Flu\., or influenza OR
3. Any incident with a match in the narrative for ILI, influenza like illness, Flu, Flu-, Flu\., or influenza.
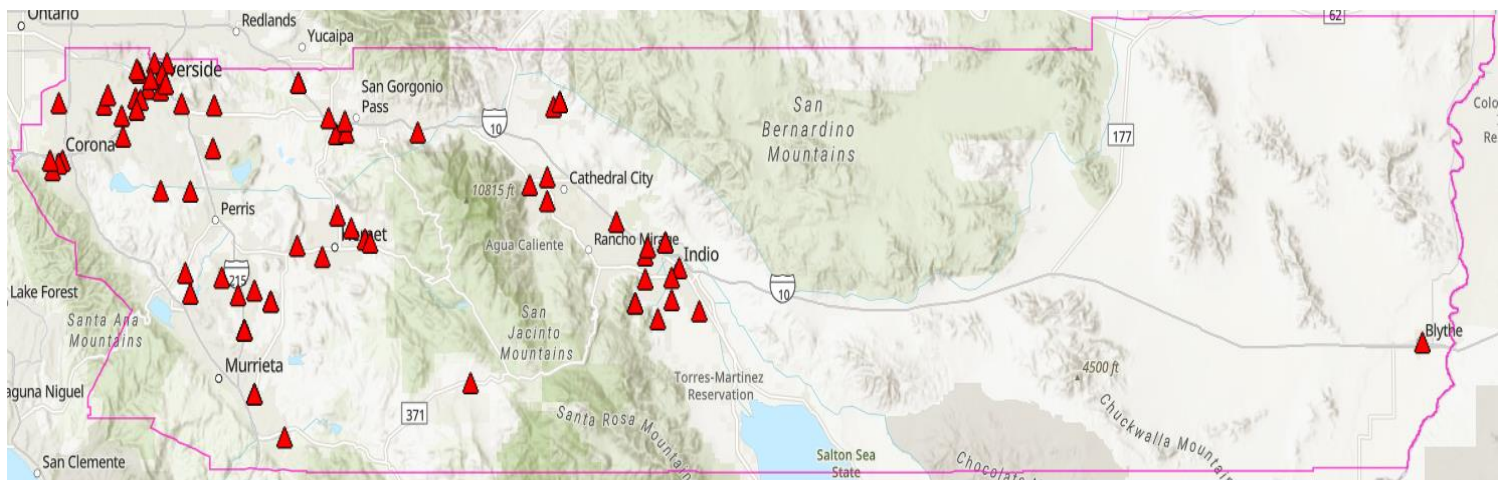

ILI - INFLUENZA-LIKE ILLNESS RESPONSE *(CONT.)*

EMS ILI response two standard deviations above the calculated baseline average during non-peak flu seasons is considered a surge in flu activity. For the current Flu season 2020-'21, the standard deviation threshold value is not calculated as there was abnormal non-peak flu season behavior due to COVID-19. The threshold value listed in the graph is based on previous years non-peak flu season. Surges are identified as color levels adapted from the *CDPH Standards and Guidelines for Healthcare Surge During Emergencies* (actual response status for the EMS system may differ):

https://www.cdph.ca.gov/Programs/EPO/CDPH%20Document%20Library/FinalEOM712011.pdf

During Week 16, EMS ILI response is BELOW the TWO (2) standard deviation threshold compared to ILI activity during non-peak flu season levels (weeks 13-39).

ILI-related EMS response in Riverside County, ePCR distribution map: Week 16

RIVERSIDE COUNTY PUBLIC HEALTH INFLUENZA-LIKE ILLNESS DATA

Riverside County Public Health Department – DOPH collects Emergency Department ILI activity data from the Center for Disease Control's (CDC) *Early Notification of Community-based Epidemics (ESSENCE)* system as part of the National Syndromic Surveillance Program (NSSP). Sixteen of 17 Riverside County hospitals participate in ESSENCE. The graph below provides a comparison between Riverside County's EMS ILI responses and Emergency Department (ED) ILI visits for the current year compared to the previous year.
Starting Week 44 2023, Loma Linda Medical center's data is added to ED volume.
EMS ILI responses and ED ILI visits as a percentage of their respective total volume – adapted from CDC methodology.
For Riverside County Public Health Department Influenza Reporting, see https://www.rivco-diseasecontrol.org/

APOT AND APOD DEFINITIONS

9-1-1 Ambulance Response
For the purpose of reporting valid, unduplicated response counts, only ground transport units responding to 9-1-1 incidents are included in this report. This excludes records from First Responder Fire Agencies arriving on scene with transport agencies as part of Riverside County's 9-1-1 dual medical response system. It also excludes non-emergency interfacility or other transport types (i.e., air ambulance) where a 30-minute time standard would not apply.

Ambulance Patient Offload Time (APOT)
The time interval between the arrival of a 9-1-1 patient at an Emergency Department (ED) and the time that patient is transferred from the ambulance gurney to a bed, chair, or other acceptable location, and the ED assumes responsibility of care.[1] The Clock Start (eTimes.11) is the time of patient arrival at the destination (hospital), and the Clock Stop (eTimes.12) is the time patient care is transferred.[2] REMSA obtains both times from the Electronic Patient Care Report (ePCR).

Ambulance Patient Offload Delay (APOD)
Any delay in ambulance patient offload time (APOT) that exceeds the local ambulance patient offload time standard (Riverside County EMS Agency applies a 30-minute standard). This shall also be synonymous with "non-standard patient offload time" as referenced in the Health and Safety Code.[3] If the transfer of care and patient offload from the ambulance gurney exceeds the 30-minute standard, it will be documented and tracked as "APOD".[4] *The Riverside County ePCR system requires medics to enter an " APOD Reason" when APOT exceeds the 30-minute standard. While the number of APODs documented as non-ED-related is nominal, beginning in Week-1 of 2022, only delays identified as having an ED origin are counted against APOD compliance for a more precise metric.*

APOD Compliance
Frequency comparison expressed in percentage between the total number of transports and those resulting in APODs having a documented ED-related origin.

Emergency Treatment Services (ETS) Ambulance Patient Offload Delay (APOD)
Transport to ETS maintains the 30-minute offload standard, however, ETS APOD includes 9-1-1 and interfacility transports (IFTs) as approximately three-quarters of ETS transports are IFTs from other medical facilitates.

Additional Data Definitions

Data in this report has been collected from ePCRs (electronic patient care reports) from FirstWatch® and are available after they have been completed by the provider. There is, therefore, an inherent latency to the availability of these records. Due to this latency, subsequent reports may feature slightly different aggregate numbers than earlier reports for the same reporting period. The difference is insignificant (averaging less than .1%) and does not impact overall compliance.

Data in this report includes all transports to the 17 hospitals monitored by REMSA in the respective week relative to the date and time the incident originates (eTimes.03--Dispatch Notified Date/Time). For example, if an incident originates on day-7 of the current reporting week, and the patient is subsequently transferred to the care of an emergency department after midnight which falls on day-1 of the subsequent week, that incident will be included in the current reporting week.
